Message from the Program Director

Welcome to the department of Computer Science and Engineering (CSE) of United International University (UIU). We are offering the first ever undergraduate program in Data Science in the country. Rapid development in the fields of Data Science (DS) over the last decade has made Data Science an emerging field of specialization. The objective of the undergraduate program in Data Science is to develop skilled and competent graduates to meet the current and future needs at home and abroad. The department has already established high performance GPU enabled computing facilities that are required for the program to run successfully in addition to the regular laboratories and other facilities. This department has got the best pool of faculty members in the country now with academic degrees, expertise and experiences in machine learning, deep learning, artificial intelligence, robotics and their application areas like bioinformatics, medical sciences, precision agriculture, epidemiology, finance, social media analytics, natural language processing, satellite imaging, remote sensing, health informatics, business and marketing. The curriculum has been developed with input taken from national and international academic and industrial experts in the relevant fields meeting international and national benchmark requirements. The department wants to work closely with the industry and government and play a pivotal role in the national transition towards Industrial Revolution 4.0.

Dr. Jannatun Noor Mukta, Associate Professor, Dept. of CSE & Director, Data Science Program
