School of Business and Economics (SoBE) Bachelor of Business Administration (BBA) BBA in Accounting & Information Systems (BBA in AIS) Master of Business Administration (MBA) Executive Master of Business Administration (EMBA) Department of Economics * Bachelor of Science in Economics * Master of Science in Economics

School of Science and Engineering (SoSE) Department of Civil Engineering * B.Sc. in Civil Engineering (CE)

Department of Computer Science and Engineering (CSE) * B.Sc. in Computer Science & Engineering (CSE) * B.Sc. in Data

Science (BSDS) * M.Sc. in Computer Science & Engineering (MSCSE)

Department of Electrical and Electronics Engineering * B.Sc. in Electrical & Electronic Engineering (EEE)

School of Humanities and Social Sciences (SoHS) Department of Environment and Development Studies * BSS in Environment and Development Studies (BSEDS)

Department of Media Studies and Journalism * BSS in Media Studies and Journalism (BSSMSJ)

Department of English * BA in English

Graduate Programs * Master in Development Studies (MDS)

School of Life Sciences (SoLS) Department of Pharmacy * Bachelor of Pharmacy (B. Pharm.)

Department of Biotechnology and Genetic Engineering * B.Sc. in Biotechnology and Genetic Engineering (BSBGE)

Institute of Natural Sciences This institute was founded in 2006 as an offshoot of UIU. INS consists of three disciplines of physical sciences: Mathematics, Physics & Chemistry. These physical sciences deal with the truths of nature and the laws that govern the world. In INS, there are 13 high-profile active faculties of whom one is a PhD holder. In addition, 9 faculty members of INS are on study leave in different well-recognized foreign universities. Besides, in each trimester, a number of well competent faculties from different public universities join the institute as adjunct faculties. INS has a history of providing quality education to the students. The teaching methods applied in INS show results of effectiveness and are supposed to undergo further improvement. INS plays an important and indispensable role in the study of engineering and business. The aim of INS is to adhere to the academic thrust of quality as well as to contribute in advancement of society and industry. In consequence this institute helps engineers to extend their strong research background. INS is committed to nurture and sharpen the intellectual growth and skills of the students through the application and dissemination of engineering. **Research Institutes & Centers** From different research institutes and centers UIU offers short study programs as well as well explore different research areaâ€™s **Institute for Advanced Research (IAR)** **Institute for Advanced Research (IAR)** **Institute of Business and Economic Research (IBER)** **Institute of Business and Economic Research (IBER)** **Institute of Development Studies and Sustainability (IDSS)** **Institute of Development Studies and Sustainability (IDSS)** at United International University (UIU), founded on 26 October, 2017, is committed to interdisciplinary hub for research, teaching, and collaborations for narrowing down the science-policy-practice gap towards sustainable development. The IDSS promises to advance knowledge of Sustainable Development through its Interdisciplinary Research and knowledge dissemination through seminars, publications and teaching. The IDSS is committed to manage and expanding the interdisciplinary major in Development Studies and Sustainability by providing students with fellowships, scholarships, and research/study opportunities through collaborations with universities in Bangladesh and foreign countries, national and International NGOs, UN organizations and business organizations. Finally, the institute promises to contribute to UIUâ€™s vision of becoming the *center of excellence in teaching, learning and research in the South Asian region*. Bangladeshâ€™s thriving urbanization and rural transformation processes are being challenged by extreme high vulnerability to climate change impacts. Increased frequency and intensity of extreme weather events, rising sea level, temperature extremes, altered precipitation patterns are posing significant threat to the resilience and sustainability of infrastructure, leading to damage of infrastructure, disruption of services and slowing down economic growth. The present infrastructure development scenario highlights the need for innovative solutions that must prioritize both resilience and sustainability. At CSIRS, we are dedicated to pioneering research and technology-driven solutions aimed at fortifying our infrastructure systems. Our interdisciplinary approach will bring together experts from diverse fields to solve complex civil engineering challenges. From researching advanced materials and smart technologies to community engagement, CSIRS will work towards shaping a more resilient and sustainable future. Join us as we **empower tomorrowâ€™s infrastructure today**. Website
